Summary

AI Engineer with hands-on experience building machine learning, computer vision, and Generative AI systems using Python, PyTorch, TensorFlow, and modern AI frameworks. Experienced in developing practical AI solutions across ML model development, RAG, LLM applications, and AI-powered inspection systems.

Work Experience

AI Engineer Intern | CESAI, EME College

Jul 2026 – Aug 2026

- Trained and evaluated a machine learning model on approximately 1,000 images for rust and defect detection, achieving 83.5% accuracy.
- Built an LLM-powered conversational assistant for real-time inspection guidance and borescope-based vehicle analysis.

AI/ML Engineer Intern | SiberKoza Alpha (NASTP)

Jul 2025 – Sep 2025

- Developed end-to-end ML pipelines on 80K+ records covering data ingestion, feature engineering, model training, evaluation, and deployment, achieving 88% accuracy.
- Used Docker, MLflow, and DVC to support model deployment, experiment tracking, and reproducible ML workflows.

Achievements

- **Vyrothon 2026 AI Hackathon Winner:** Ranked 1st among 580+ applicants by developing an AI-powered voice agent for real estate lead automation.
- **Algoryc AI Hackathon 2026:** Shortlisted among approximately 40 invite-only participants.
- **Invited Speaker – GDG on Campus COMSATS Abbottabad:** Delivered a webinar on Artificial Intelligence and AI development.

Technical Skills

- **Programming & Backend:** Python, SQL, FastAPI, Git, Docker
- **Machine Learning & AI:** Machine Learning, Deep Learning, PyTorch, TensorFlow, scikit-learn, XGBoost, Computer Vision, NLP
- **Generative AI:** LLMs, RAG, LangChain, Prompt Engineering, Conversational AI
- **MLOps & Data:** MLflow, DVC, GitHub Actions, PostgreSQL, MongoDB, ChromaDB, Pandas, NumPy

Projects

MeetingMind – AI Video & Meeting Assistant

[\[GitHub\]](#)

- Built an end-to-end AI meeting assistant using Python, LangChain, OpenAI APIs, and ChromaDB for multi-lingual transcription, summarization, action-item extraction, and conversational RAG.
- Implemented embeddings and vector retrieval for context-grounded Q&A across English, Urdu, and multilingual speech.

Final Year Project – AI-Based Virtual Try-On System

[\[GitHub\]](#)

- Developed a computer vision system using image segmentation, pose estimation, and diffusion models to generate realistic clothing visualizations.
- Built a modular PyTorch and OpenCV pipeline for end-to-end inference from input images to generated try-on outputs.

PurchasePulse – Real-Time Purchase Intent Prediction

[\[GitHub\]](#)

- Built an XGBoost prediction system on 66 features achieving 90.23% accuracy and 0.89 ROC-AUC, served through FastAPI.
- Integrated MLflow tracking, Docker Compose, Streamlit monitoring, and DVC for reproducible ML workflows.

Education

BSc Artificial Intelligence | NUML, Islamabad

2022 – 2026

- Relevant Coursework: Machine Learning, Deep Learning, Artificial Neural Networks, NLP, Computer Vision

Certifications

- **Supervised Machine Learning: Regression and Classification** [Verify](#)
- **Oracle Cloud Infrastructure AI Foundations Associate** [Verify](#)
- **Oracle Cloud Infrastructure Generative AI Professional** [Verify](#)
