Professional Summary

Detail-oriented Data Analytics and BS in Artificial Intelligence graduate with hands-on experience in data collection, cleaning, analysis, and visualization. Proficient in Excel, SQL, Python, and Power BI with a strong ability to translate complex datasets into actionable business insights. Comfortable in collaborating with cross-functional teams and presenting findings through clear dashboards and reports.

Education

National University of Modern Languages (NUML), Islamabad

2022–2026

Bachelor of Science in Artificial Intelligence

Relevant Coursework: Database Systems, Data Mining, Statistics, Machine Learning, Business Analytics

Skills

Data Analysis & Visualization: MS Excel (Pivot Tables, Lookups), Power BI, Tableau

Programming & Databases: Python (Pandas, NumPy, Matplotlib), SQL (CTEs, Subqueries, Aggregations)

Analytics Techniques: Data Cleaning, EDA, Trend Analysis, Reporting, Data Quality Checks

Professional Skills: Attention to Detail, Problem Solving, Communication, Stakeholder Collaboration

Data Analytics Experience & Projects

Deloitte Data Analytics Job Simulation

Sept 2025

Cleaned and analyzed raw business datasets using Excel to ensure accuracy and consistency. Developed an interactive Tableau dashboard to highlight trends and KPIs for client decision-making. Presented insights in a clear, business-focused manner for non-technical stakeholders. Certificate

Power BI Business Dashboards

Power BI

Designed interactive dashboards to support management decision-making. Identified key customer segments contributing to **30% of total revenue**. Applied best practices in data modeling and visualization to improve report clarity.

SQL Customer Analytics Project

SQL

Analyzed a dataset of 50,000+ customer records using advanced SQL queries. Used CTEs and subqueries to segment high-value customers for targeted analysis. Improved reporting efficiency and accuracy. 

Target E-Commerce Data Analysis

Google BigQuery, SQL

Analyzed 99,000+ orders generating approximately 15.8M in revenue. Identified purchasing trends and performance metrics to support sales strategy. Delivered actionable insights through structured queries and summary reports. 

Airbnb Exploratory Data Analysis

Python

Cleaned and prepared a dataset of 20,000+ records for analysis. Conducted exploratory analysis to uncover pricing and location-based trends. Visualized insights using Matplotlib and Seaborn. 

other projects related to data-analytics are on github.

Certifications

Excel Specialization for Data Analytics – Coursera

Complete Data Analytics Bootcamp –Udemy

Oracle Cloud Infrastructure 2025 Certified Generative AI Professional - Oracle
